DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-294, drawn to an optical waveguide on a substrate, classified in class 385, subclass 131.
- II. Claims 295-302 and 303, drawn to a method of design/manufacturing integrated optical devices, classified in class 438, subclass 31.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made using the process in U.S. Patent Application Publication 2003/0036213 to Brophy.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Should Applicant elect Invention I, it is noted that this application contains claims directed to the following patentably distinct species of the claimed invention:

Art Unit: 2883

Group 1 is drawn towards Figure 1.

Group 2 is drawn towards Figure 2.

Group 3 is drawn towards Figure 3.

Group 4 is drawn towards Figure 4.

Group 5 is drawn towards Figure 5.

Group 6 is drawn towards Figure 6.

Group 7 is drawn towards Figure 7.

Group 8 is drawn towards Figure 8

Group 9 is drawn towards Figure 9.

Group 10 is drawn towards Figure 10.

Group 11 is drawn towards Figure 11.

Group 12 is drawn towards Figure 12.

Group 13 is drawn towards Figure 13.

Should Applicant elect Invention II, it is noted that this application contains claims directed to the following patentably distinct species of the claimed invention:

^A
Group ~~1~~, Claims 295-301, drawn towards a method of designing a plurality of dielectric layers for an optoelectronic circuit.

^B
Group ~~2~~, Claim 302, drawn towards a method of making integrated optical devices comprising design of feature sizes smaller than the minimum feature size.

Art Unit: 2883

Group ^C~~2~~, Claim 303, drawn towards a method of fabricating integrated optical devices with curved features different than a plurality of x and y geometrical design rules.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 2883

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
